

Pre-Drive Donor Interest Survey

Each day, the Community Blood Bank needs the support of more than 100 volunteer blood donors to help patients in 34 hospitals throughout the region, including Sanford Medical Center, Avera McKennan Hospital, V.A. Medical Center, Avera Heart Hospital, Sanford Children’s Castle, Sanford Heart Hospital and Sioux Falls Specialty Hospital. Donating blood takes little time (30 -35 minutes) and the impact towards the community and our patients is immense. Please consider donating blood at your organization’s sponsored blood drive.

Why Should I Give Blood?

1. **Health.** You will receive a limited health check including your medical history, hemoglobin level, temperature, blood pressure and pulse rate.
2. **Teamwork.** You will feel a sense of pride knowing that you and your co-workers are helping the community. All the blood donated with Community Blood Bank impacts lives directly at your community hospital. (Community Blood Bank is the sole blood provider for your local hospital and takes pride in being self sufficient. Community Blood Bank is not associated with any other blood bank entity).
3. **Self-Satisfaction.** You will help out as many as three patients at your local hospital.
